LIBRARY NEWSLETTER

REVITALIZATION

• Paper Recycling

The Library cares about the environment and has implemented green policy and practices in different areas and where possible.

To support waste recycling, paper recycle bins are provided in the Photocopying Room (G/F) and right next to the photocopiers on every floor starting from Jan 2014. Users are encouraged to put their waste paper into these bins. The waste paper will be collected by Facilities Management Office for delivering to a recognized manufacturer for recycling.

• Seating Re-arrangement and Additional Power Outlets on 4/F and 5/F

To enhance navigation and to provide a more comfortable and spacious study environment, the Library has re-arranged the study tables in Room L401 and L501 by separating them into smaller clusters. Book shelves are also re-shuffled in L501 in order to spare the space with natural lighting for user study. Additional power outlets have also been installed along the wall near the lift lobby in L401 & L501. Subject to funding support, the Library will try to provide sufficient power outlets in future renovation projects to support users in using portable devices.
